PROJECT OF THE EXHIBITION OF GENERAL HYGIENE FOR 1910.

[Copy of the general programme, to be supplemented by the regulations and the detailed programme with the classification of the exhibition and of the exhibits.]

The general exhibition of hygiene will be opened in the city of Buenos Aires in May, 1910.

This exhibition of hygiene will be universal as regards the exhibits in connection with hygiene and international as regards representation.

It will be divided with reference to representation and competition for prizes in the following manner:

1. National competition.
2. International Latin-American competition.
3. General competition.

The competitors in the national competition will be the exhibitors of the Argentine Republic with exhibits produced and manufactured exclusively in the country.

The competitors in the International Latin-American competition will be those of all the Latin-American nations with exhibits produced or manufactured exclusively in their respective countries.

The competitors in the general competition will be those of all the other nations of the world and of the Argentine Republic and the other Latin-American nations which in an especial way manifest their desire to compete.

The competitors of the Argentine Republic with exclusively national products and those of Latin America in the same conditions will receive the necessary space for their installations covered and free of charge. The installations will be at their own expense.

The competitors of the other nationalities will receive the space necessary for their installations free of charge and in case they need covered space such will be at their own expense.

The exhibition will be eminently practical and will occupy an extensive site, with easy and frequent access, sufficient for all the installations and customary accessories in these exhibitions.

The exhibition will close on the —— of 1910 and within the following forty days the exhibition premises must be evacuated.

AUSTRALIA.

*Report from Newcastle—Further relative to plague case imported from Sydney.*

Consul Killmaster reports, April 5:

There is one case of bubonic plague at this port. This case originated at Sydney. The patient came to Newcastle to work as a rat catcher for the city council. He had previously been engaged in cleansing operations in the plague area in Sydney, and had been thus employed where a large number of plague rats were found, and where several fatal cases of the disease originated. He has been in the isolation ward of the Newcastle hospital since March 18 last and has now almost recovered.

In reply to an inquiry from this consulate the medical health officer of the port of Newcastle writes, under date of April 2, 1909, that the plague patient at present in the Newcastle hospital fell ill within twenty-four hours after his arrival at Newcastle from Sydney.

(See Public Health Reports, May 21, 1909, p. 691.)
